Dear Sir/Madam:

On behalf of my Mother, Irene Tracy, and myself we do not believe this is a good time to allow Peaks Mill Water District to increase their costs.

Mrs. Tracy is on a fixed income and has not received any sort of increase in the past several years until this year; however, her medical costs have increased which takes that increase each month.

I contacted Peaks Mill Water District in October concerning a gate their contractors tore up and to date that gate has NOT been replaced.

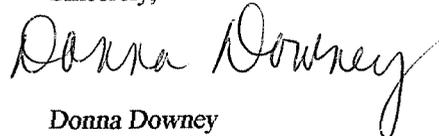

They waste money by taking an ad in the paper that they will be closed. I don't see any other water company's ads announcing they will be closed on holidays. To me, that is a waste of consumer dollars.

A 26.48% increase for the basic water usage is unfair to all consumers during these bad economical times. I don't know of anyone who has received that much of an increase in their paychecks at any one time.

I, therefore, request on behalf of my Mother and me that the increase be denied at this time.

Thank you.

Sincerely,

  
Donna Downey
